Product datasheet for TA319644

Endo G (ENDOG) Mouse Monoclonal Antibody

Product data:

Product Type:	Primary Antibodies
Applications:	WB
Recommend Dilution:	WB: 5 - 10 ug/mL
Reactivity:	Human, Rat
Host:	Mouse
lsotype:	lgG1
Clonality:	Monoclonal
Immunogen:	Recombinant protein corresponding to amino acids 51 - 140 of human EndoG.
Formulation:	EndoG Monoclonal Antibody is supplied in PBS containing 0.02% sodium azide.
Concentration:	1ug/ul
Purification:	EndoG Monoclonal Antibody is immunoaffinity chromotography purified lgG.
Gene Name:	endonuclease G
Database Link:	<u>NP_004426 Entrez Gene 362100 RatEntrez Gene 2021 Human</u>
Background:	EndoG Monoclonal Antibody: The fragmentation of nuclear DNA is a hallmark of apoptotic cell death. The activities of caspase and nuclease are involved in the DNA fragmentation. Caspase-activated deoxyribonuclease (CAD), also termed DNA fragmentation factor (DFF40), is one such nuclease, and is capable of inducing DNA fragmentation and chromatin condensation after cleavage by caspase-3 of its inhibitor ICAD/DFF45. Caspase and CAD independent DNA fragmentation also exists. Recent studies demonstrated that another nuclease, endonuclease G (EndoG), is specifically activated by apoptotic stimuli and is able to induce nucleosomal fragmentation of DNA independently of caspase and DFF/CAD. EndoG is a mitochondrion-specific nuclease that translocates to the nucleus and cleaves chromatin DNA during apoptosis. The homologue of mammalian EndoG is the first mitochondrial protein identified to be involved in apoptosis in <i>C. elegans</i> . EndoG also cleaves DNA in vitro.
Synonyms:	FLJ27463
Protein Families:	Druggable Genome
Protein Pathways:	Apoptosis
