Product datasheet for TA336573

SIAH1 Mouse Monoclonal Antibody [Clone ID: 8G7H12]

Product data:

Product Type:	Primary Antibodies
Clone Name:	8G7H12
Applications:	WB
Recommend Dilution:	WB: 1:500, IP: 1:10-1:500
Reactivity:	Drosophila, Human, Mouse, Porcine, Rat, Zebrafish
Host:	Mouse
lsotype:	lgG1
Clonality:	Monoclonal
Immunogen:	Synthetic peptide made to a C-terminal portion of the drosophila SINA protein (within residues 280-331). [Swiss-Prot# P21461]
Formulation:	Tris-citrate/phosphate, pH 7, 0.1% Sodium azide. Store at 4C. Do not freeze.
Concentration:	This product is unpurified. The exact concentration of antibody is not quantifiable.
Purification:	Tissue culture supernatant
Predicted Protein Size:	37 kDa
Predicted Protein Size: Gene Name:	37 kDa siah E3 ubiquitin protein ligase 1
Gene Name:	siah E3 ubiquitin protein ligase 1
Gene Name: Database Link:	siah E3 ubiquitin protein ligase 1 <u>NP 003022 Entrez Gene 140941 RatEntrez Gene 6477 Human</u> The Drosophila SINA (seven in absentia) protein is an E3 ubiquitin ligase component of the RAS signal transduction pathway. The RAS signal pathway controls cell proliferation, differentiation, and survival, and regulation of this pathway is critical for normal development. In Drosophila SINA serves as a downstream gatekeeper required for proper RAS signal transduction. Similarly to SINA in Drosophila, the human protein SIAH has also
Gene Name: Database Link: Background:	siah E3 ubiquitin protein ligase 1 <u>NP 003022 Entrez Gene 140941 RatEntrez Gene 6477 Human</u> The Drosophila SINA (seven in absentia) protein is an E3 ubiquitin ligase component of the RAS signal transduction pathway. The RAS signal pathway controls cell proliferation, differentiation, and survival, and regulation of this pathway is critical for normal development. In Drosophila SINA serves as a downstream gatekeeper required for proper RAS signal transduction. Similarly to SINA in Drosophila, the human protein SIAH has also been shown to be required for oncogenic RAS signaling in cancer.
