

Product datasheet for **TA502027**

TTL Mouse Monoclonal Antibody [Clone ID: OTI3G5]

Product data:

Product Type:	Primary Antibodies
Clone Name:	OTI3G5
Applications:	WB
Recommend Dilution:	WB 1:500
Reactivity:	Human
Host:	Mouse
Isotype:	IgG1
Clonality:	Monoclonal
Immunogen:	Full length human recombinant protein of human TTL (NP_714923) produced in HEK293T cell.
Formulation:	PBS (PH 7.3) containing 1% BSA, 50% glycerol and 0.02% sodium azide.
Concentration:	0.42 mg/ml
Purification:	Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)
Predicted Protein Size:	43.0 kDa
Gene Name:	tubulin tyrosine ligase
Database Link:	NP_714923 Entrez Gene 150465 Human
Background:	TTL is a cytosolic enzyme involved in the posttranslational modification of alpha-tubulin (see MIM 602529). Alpha-tubulin within assembled microtubules is detyrosinated over time at the C terminus. After microtubule disassembly, TTL restores the tyrosine residues and consequently participates in a cycle of tubulin detyrosination and tyrosination (Erck et al., 2003 [PubMed 14571137]). [supplied by OMIM]. COMPLETENESS: complete on the 3' end.
Synonyms:	MGC46235

Product images:

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY TTL ([RC207805], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-TTL. Positive lysates [LY403517] (100ug) and [LC403517] (20ug) can be purchased separately from OriGene.
