

## Product datasheet for TA503218

### PSMD2 Mouse Monoclonal Antibody [Clone ID: OTI1A12]

#### Product data:

Product Type:	Primary Antibodies
Clone Name:	OTI1A12
Applications:	IF, WB
Recommend Dilution:	WB 1:2000, IF 1:100
Reactivity:	Human
Host:	Mouse
Isotype:	IgG2a
Clonality:	Monoclonal
Immunogen:	Full length human recombinant protein of human PSMD2(NP_002799) produced in HEK293T cell.
Formulation:	PBS (PH 7.3) containing 1% BSA, 50% glycerol and 0.02% sodium azide.
Concentration:	1 mg/ml
Purification:	Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)
Predicted Protein Size:	100 kDa
Gene Name:	proteasome 26S subunit, non-ATPase 2
Database Link:	<a href="#">NP_002799</a> <a href="#">Entrez Gene 5708</a> <a href="#">Human</a>
Background:	<p>The 26S proteasome is a multicatalytic proteinase complex with a highly ordered structure composed of 2 complexes, a 20S core and a 19S regulator. The 20S core is composed of 4 rings of 28 non-identical subunits; 2 rings are composed of 7 alpha subunits and 2 rings are composed of 7 beta subunits. The 19S regulator is composed of a base, which contains 6 ATPase subunits and 2 non-ATPase subunits, and a lid, which contains up to 10 non-ATPase subunits. Proteasomes are distributed throughout eukaryotic cells at a high concentration and cleave peptides in an ATP/ubiquitin-dependent process in a non-lysosomal pathway. An essential function of a modified proteasome, the immunoproteasome, is the processing of class I MHC peptides. This gene encodes one of the non-ATPase subunits of the 19S regulator lid. In addition to participation in proteasome function, this subunit may also participate in the TNF signalling pathway since it interacts with the tumor necrosis factor type 1 receptor. A pseudogene has been identified on chromosome 1. [provided by RefSeq]</p>

Synonyms: P97; RPN1; S2; TRAP2

Protein Families: Druggable Genome

Protein Pathways: Proteasome

### Product images:

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY PSMD2 ([RC203204], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-PSMD2. Positive lysates [LY419097] (100ug) and [LC419097] (20ug) can be purchased separately from OriGene.

Anti-PSMD2 mouse monoclonal antibody (TA503218) immunofluorescent staining of COS7 cells transiently transfected by pCMV6-ENTRY PSMD2 ([RC203204]).
