# Product datasheet for TA506107

## ERG Mouse Monoclonal Antibody [Clone ID: OTI2G8]

### **Product data:**

Product Type:	Primary Antibodies
Clone Name:	OTI2G8
Applications:	IF, WB
<b>Recommend Dilution:</b>	WB 1:4000, IF 1:100
Reactivity:	Human
Host:	Mouse
lsotype:	lgG2a
Clonality:	Monoclonal
Immunogen:	Full length human recombinant protein of human ERG(NP_891548) produced in HEK293T cell.
Formulation:	PBS (PH 7.3) containing 1% BSA, 50% glycerol and 0.02% sodium azide.
Concentration:	1 mg/ml
Purification:	Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)
Predicted Protein Size:	53.7 kDa
Gene Name:	ETS transcription factor ERG
Database Link:	<u>NP_891548 Entrez Gene 2078 Human</u>
Background:	This gene encodes a member of the erythroblast transformation-specific (ETS) family of transcriptions factors. All members of this family are key regulators of embryonic development, cell proliferation, differentiation, angiogenesis, inflammation, and apoptosis. The protein encoded by this gene is mainly expressed in the nucleus. It contains an ETS DNA-binding domain and a PNT (pointed) domain which is implicated in the self-association of chimeric oncoproteins. This protein is required for platelet adhesion to the subendothelium, inducing vascular cell remodeling. It also regulates hematopoesis, and the differentiation and maturation of megakaryocytic cells. This gene is involved in chromosomal translocations, resulting in different fusion gene products, such as TMPSSR2-ERG and NDRG1-ERG in prostate cancer, EWS-ERG in Ewing's sarcoma and FUS-ERG in acute myeloid leukemia.

Multiple alternatively spliced transcript variants encoding different isoforms have been

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY ERG ([RC208093], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-ERG. Positive lysates [LY403650] (100ug) and [LC403650] (20ug) can be purchased separately from OriGene.

Anti-ERG mouse monoclonal antibody (TA506107) immunofluorescent staining of COS7 cells transiently transfected by pCMV6-ENTRY ERG ([RC208093]).
