Product datasheet for TA805928

Factor I (CFI) Mouse Monoclonal Antibody [Clone ID: OTI7C8]

Product data:

Product Type:	Primary Antibodies
Clone Name:	OTI7C8
Applications:	IHC
Recommend Dilution:	IHC 1:2000
Reactivity:	Human
Host:	Mouse
lsotype:	lgG2b
Clonality:	Monoclonal
Immunogen:	Human recombinant protein fragment corresponding to amino acids 340-583 of human CFI(NP_000195) produced in E.coli.
Formulation:	PBS (PH 7.3) containing 1% BSA, 50% glycerol and 0.02% sodium azide.
Concentration:	1 mg/ml
Purification:	Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)
Predicted Protein Size:	63.4 kDa
Gene Name:	complement factor l
Database Link:	<u>NP_000195 Entrez Gene 3426 Human</u>
Background:	This gene encodes a serine proteinase that is essential for regulating the complement cascade. The encoded preproprotein is cleaved to produce both heavy and light chains, which are linked by disulfide bonds to form a heterodimeric glycoprotein. This heterodimer can cleave and inactivate the complement components C4b and C3b, and it prevents the assembly of the C3 and C5 convertase enzymes. Defects in this gene cause complement factor I deficiency, an autosomal recessive disease associated with a susceptibility to pyogenic infections. Mutations in this gene have been associated with a predisposition to atypical hemolytic uraemic syndrome, a disease characterized by acute renal failure, microangiopathic hemolytic anemia and thrombocytopenia. Primary glomerulonephritis with

immmune deposits is another condition associated with mutation of this gene. [provided by

GRIGENE Factor I (CFI) Mouse Monoclonal Antibody [Clone ID: OTI7C8] – TA805928

Synonyms:	AHUS3; ARMD13; C3b-INA; C3BINA; FI; IF; KAF
Protein Families:	Druggable Genome, Protease, Secreted Protein
Protein Pathways:	Complement and coagulation cascades
