# Product datasheet for TA807103

# Renin (REN) Mouse Monoclonal Antibody [Clone ID: OTI1D3]

## **Product data:**

Product Type:	Primary Antibodies
Clone Name:	OTI1D3
Applications:	IHC, WB
<b>Recommend Dilution:</b>	WB 1:500, IHC 1:150
Reactivity:	Human
Host:	Mouse
lsotype:	lgG2a
Clonality:	Monoclonal
Immunogen:	Human recombinant protein fragment corresponding to amino acids 131-406 of human REN(NP_000528) produced in E.coli.
Formulation:	PBS (PH 7.3) containing 1% BSA, 50% glycerol and 0.02% sodium azide.
Concentration:	1 mg/ml
Purification:	Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)
Predicted Protein Size:	42.3 kDa
Gene Name:	renin
Database Link:	<u>NP_000528 Entrez Gene 5972 Human</u>
Background:	Renin catalyzes the first step in the activation pathway of angiotensinogena cascade that can result in aldosterone release,vasoconstriction, and increase in blood pressure. Renin, an aspartyl protease, cleaves angiotensinogen to form angiotensin I, which is converted to angiotensin II by angiotensin I converting enzyme, an important regulator of blood pressure and electrolyte balance. Transcript variants that encode different protein isoforms and that arise from alternative splicing and the use of alternative promoters have been described, but their full-length nature has not been determined. Mutations in this gene have been shown to cause familial hyperproreninemia. [provided by RefSeq, Jul 2008]
Synonyms:	HNFJ2
Protein Families:	Druggable Genome, Secreted Protein
Protein Pathways:	Renin-angiotensin system

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2020 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US 

## **Product images:**

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY REN ([RC208382], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-REN (1:500). Positive lysates [LY424660] (100ug) and [LC424660] (20ug) can be purchased separately from OriGene.

Immunohistochemical staining of paraffinembedded Human colon tissue within the normal limits using anti-REN mouse monoclonal antibody. (Heat-induced epitope retrieval by Tris-EDTA, pH8.0, TA807103) (1:150)
